Ramiz KHALED

Bio-Informatics developer & data analyst

+33 7 49 14 82 77
ramezkh18@gmail.com
Paris

Bioinformatics engineer with 2+ years of experience in multi-omics data analysis, pipeline development, and automation. Skilled in data processing and statistical analysis. Experienced in building robust workflows and collaborating with biologists. Experienced in collaborating with biologists and applying computational methods to biomedical and pharmacology research.

Expertise

Bioinformatics

- Biostatistics
- NGS Sequencing
- Multi-omics analysis
- Modelisation
- Molecules interaction study
- FAIR Pipeline development & automation
- AI - ML and deep learning analysis

Programming

- Python, R, MATLAB, Bash
- JAVA, HTML/CSS, JS
- DJANGO, FLASK, RESTful API , REACT
- SQL, ORACLE
- TensorFlow, PyTorch

Tools & Environment

- LINUX/Unix
- GIT, Conda, Docker
- Galaxy, NextFlow

Projects & startup

Infrastructure manager | Paris Biofoundry

Galaxy, sythesis biology, Microbiology, admin, Anaconda

dev in Galaxy-synBioCAD | synBioCAD

Python, cheetah, xml, git, conda

Web Development | Start Up

Python, Django, Oracle, RESTful API, REACT, JS, HTML/CSS

Language

English
Experiment (C2) ★★★★☆

French
Experiment (C2) ★★★★☆

Native ★★★★★

Dutch
Beginner ★☆☆☆☆

Hobbies

Sport | Football / basketball
Player of AL-NAHDA FC

Work Experience

2024-Now

Engineer in Bio-informatics | MICALIS, Paris

- Developed and maintained bioinformatics pipelines (FAIR) for synthetic biology analysis
- Implemented automated workflows using Galaxy and Python
- Performed statistical and computational analysis of biological datasets
- UX/UI, FullStack and Web dev for SQL DBs and API interaction.
- Managed bioinformatics infrastructure and tools deployment(Conda, SQL, APIs)

2023-2024
1 Year

Engineer in Bio-informatics | MetaToul, Toulouse

- Developed workflow for untargeted LC-MS Lipidomic's analysis
- Development of Statisticls tool "StatChill"
- Did ML and classification analysis
- Developed and maintained bioinformatics pipelines for multi-omics data analysis

2021-2022
6 months

Engineer in Bio-informatics | BIOASTER, Lyon

- Studied the glycosylation of IgG-Fc and receptors interaction.
- Collaborated with biologists for data interpretation
- Created Glycopeptide Databases
- Developed and improved a targeted LC-MS analysis tool (TYL)
- Used MATLAB, R, Python

2021-2022
6 months

University Workshop | Lille university

- **Transcriptomics:** RNA-seq/scRNA-seq on human genome & influence of iRNA on furin expression in cancer condition.
- **Biostatistics:** Compared the results of several protein extraction methods.
- **Proteomics: Wet Lab** analyzed protein using MALDI-TOF-MS / MS-MS.
- **Network analysis:** Made protein interaction using AF2

2020-2021
3 months

Laboratory Technician | Dr. Samir Ghanem laboratory

- Did Microbiology analysis
- Did ELISA immunology tests
- Did Blood tests

Education

2022 - 2023
Master 2 in Drug Discovery
Lille University - Lille, 59 - France

2021 - 2022
Master 2 in Bio-Informatics
Lille University - Lille, 59 - France

2019 - 2021
Technical degree in Computer science
Technical institute of Bakhoun - Lebanon

2019 - 2020
Master 1 in Biochemistry
Lebanese university - Lebanon

2017 - 2019
Bachelor's in Biochemistry
Lebanese university - Lebanon
